

# 6 Pros

## of using TECHNOLOGY in the CLASSROOM

### 1 Instant Feedback

- Use personal devices for instant responses
- Retrieve feedback anonymously
- Discuss topics timely
- Ensure understanding

### 2 Engage EVERY Student

Online polls improve participation among shy students

Learn what students know at the beginning of class

Adjust focus of coursework for more effective learning

Try the same poll at the end of class to gauge what was learned

### 3 Technology Supplies Countless Resources

### 4 Reduce Tedious Task Time

- Automation in an LMS reduces the number of manual tasks
- Graded assignments can be automatically posted to the gradebook
- Set up answers to common questions
- Keep track of attendance automatically

### 5 Technology provides up-to-date course materials and opportunities to:

share and collaborate in forums

add fresh and exciting information

gain a deeper understanding

interact with instructors and class mates outside of class

### 6 It's a Digital World! Digital Literacy is a Vital Life Skill

Being digitally literate means more than having technical skills and requires practice

Don't lose sight of preparing students for the real world

Differentiating reliable from unreliable sources must be learned

Proper online etiquette starts in the classroom
